Aptitudes

As a Full Stack and Software Developer, I am proficient in the PERN stack and TypeScript/JavaScript, complemented by practical experience in Python and Java. I design user interfaces in Figma, structure relational databases, and develop automations by integrating AI workflows (n8n, local LLMs), alongside managing service deployments through containerization (Docker, Caddy).

I have advanced experience in Linux system administration and enterprise network infrastructure (VLANs, WireGuard, pfSense, managed switches). Additionally, I install and configure VoIP environments from the ground up, managing IP-PBX systems, IVRs, and SIP/XML hardware provisioning (FreePBX, Grandstream).

English Level: Advanced/Native.
